Regional Anesthesia & Pain Medicine

Complications in regional anaesthesia and pain medicine are relatively rare events with a possible range from mild (e.g. mild haemodynamic alterations after spinal anaesthesia) to severe (e.g. nerve injury after peripheral nerve block) to catastrophic (e.g. paraplegia after neuraxial block).

Complications in Regional Anesthesia and Pain Medicine

...

Complications of Regional Anesthesia (Nerve Blocks)

Complications from regional anesthesia or nerve blocks have been reduced with the utilization of ultrasound-guided placement. Because all nerve blocks require the use of needles, there is always the potential for bleeding, hematoma formation, bruising at the puncture site, or infection.
