Editorial Reviews. Heat is defined in physics as the transfer of thermal energy across a well-defined boundary around a thermodynamic system. It is a characteristic of a process and is not statically contained in matter. In engineering contexts, however, the term heat transfer has acquired a specific usage, despite its literal redundancy...

9780023214400 - Heat Transfer by Alan J Chapman

Emissivity (ϵ) is a measure of how much thermal radiation a body emits to its environment. It is the ratio of the radiation emitted from its surface to the theoretical emissions of an ideal black body of the same size and shape. This parameter thus defines radiative heat transfer away from a given object.

THERMAL EMISSIVITY AND RADIATIVE HEAT TRANSFER
