A comprehensive and integrated approach to cybersecurity is the only viable path to achieving predictability in uncertain times. Our experts in the CERT Division conduct cybersecurity research and create models, tools, and methods to empower organizations to gain justified confidence in their cybersecurity posture.

Enterprise Risk and Resilience

“Cyber Resiliency of course refers to the cybersecurity goals of modern systems, while Physical Resiliency references traditional engineering and architecture goals. These traditional techniques include redundancy; failover, or quick restart; reconfiguration; and grid hardening techniques — with the goal of minimizing disruption to a system’s functionality.”
