By the year 2000, things had changed almost as much again. By this time there were advanced carbon fibre sailplanes over 26 me tres span with winglets, retractable motors and data loggers. The nine-year old boy, still lurking within myself, remains totally fasci nated and astonished. Yet the memory and rapture of the early years do not fade. In

The Schempp-Hirth Cirrus is an Open Class glider built by Schempp-Hirth between 1967 and 1971 and by VTC until 1977. ... Sailplanes 1965-2000, Equip, 2000; External links. Wikimedia Commons has media related to Schempp-Hirth Cirrus.

### Schempp-Hirth Cirrus - Wikipedia

A glider or sailplane is a type of glider aircraft used in the leisure activity and sport of gliding (also called soaring). This unpowered aircraft can use naturally occurring currents of rising air in the atmosphere to gain altitude. Sailplanes are aerodynamically streamlined and so can fly a significant distance forward for a small decrease in altitude

### Glider (sailplane) - Wikipedia

The ASK 21 was designed by Rudolf Kaiser to replace the popular ASK 13, providing a modern two-seat aircraft bridging the gap between initial training and single-seat performance flying. The ASK 21 is the first full-GRP two-seater produced by Schleicher , flying for the first time in February 1979 (6.2.1979).
