Fridtjof Nansen takes us by sea and land across Russia to the Pacific and back just before the Revolution - telling the story in his inimitable style.

This optical-character version is uncorrected (though Nansen's fine photographs reproduce fairly well).

It continued southward for some 1,000 miles (1,600 km) through the then-dry seafloor of the Bering Strait and occupied roughly the northern half of the Bering Sea. Over the next several thousand years, as the glaciers melted and sea levels began to rise, Beringia gradually shrank in size until, eventually, the land connection was completely lost.
